Bajrangi Bhaijaan (2015) 720p BluRay x264 YIFY. Pakistani mute girl Bajrangi (Kareenaâ; Bajrangi Bhaijaan) from Kurukshetra. Acute kidney injury caused by serious liver disease after carbon tetrachloride administration. In the present study, carbon tetrachloride (CCl₄) was administered to male Wistar rats (10 ml/kg, i.p.) with severe liver disease and acute kidney injury (AKI). Carbon tetrachloride intoxication leads to the development of a cholestatic type of acute liver injury. Carbon tetrachloride produces not only oxidative stress but also binds to and activates the macrophage, which is a potential source of pro-inflammatory cytokines and pro-fibrogenic growth factors. Our study shows that the administration of carbon

tetrachloride resulted in the development of liver dysfunction and oxidative stress, and AKI. Thus, the present study shows that acute liver injury after CCl₄ administration aggravates the results of AKI.

Moyamoya syndrome in a patient with systemic lupus erythematosus. We report a case of a patient with systemic lupus erythematosus (SLE) who developed a left-sided moyamoya vasculopathy. A patient presented with aphasia and right hemiparesis. MRI demonstrated a large left-sided infarct and angiography showed occlusion of the left carotid and middle cerebral arteries as well as a collaterally developed leptomeningeal anastomosis (moyamoya type). The aphasia and hemiparesis improved after carotid and middle cerebral artery revascularisation.

There is very limited information on patients with SLE and moyamoya type of vasculopathy. Moyamoya disease is a rare cause of stroke in children, and it is

thought to be linked to genetic and immunological factors. Jill Abrahams Jill Abrahams was an American singer-songwriter and musician from New York. Born in Stamford, Connecticut, she played guitar and sang in rock bands in the 1970s and '80s.
